

WALL INSTALL TEMPLATE

DETAILS:

Acrylic Frames for Photo or Info/Poster Inserts / Rod Suspended

1. Acrylic frames used with vertical rod system are supplied as a set with 1/8" thick "clear" acrylic panel for backing and 1/8" thick "non-glare" acrylic panel for use as front cover. Panels are drilled for use with M4 studs. Holes are drilled for use with 14" rod centers.
2. Rods are mounted onto the wall with **WM11-10** supports. **P01** decorative support plates are optional.
3. Join three of the **R1500-10** threaded rods together to create a 177" long rod. Use **REC-10** end caps for rod-end finishing if necessary, otherwise cut rods and finish at support level.
4. Use **RS13-10** supports to mount the acrylic info/poster frames to rods spacing them equally.
5. Inserts are mounted in between the two pieces of acrylic and fixed in place with low-tack (**3MTM 9415PC Removable Repositionable**) double sided adhesive tape.

Note: Non-glare (non-reflective) acrylic front cover helps to reduce the glare and provides a mild protection against harmful UV rays.
